

Dear students,

As we all know that the world is fighting with a deadly disease known as COVID 19. We have news , messages coming in from all the sources . As a result of which our government has decided to lockdown the whole country. So all the students are asked to prepare a PPT on COVID 19. The PPT should contain minimum of 10 slides. It should cover all the key points such as , the mode of transfer, its details etc. So gear up and make the maximum use of time you have.

Please go through a small questionnaire given below and try to answer the questions.

- Is this disease viral , bacterial or fungal .
- Name of the agent causing this disease.
- What is the mode of transmission of this disease.
- What do you understand by the term “Pandemic “
- How does this disease started.
- What are the ways by which we can stop the spread of this disease.
- List the steps taken by our government so far to eradicate this disease.
- Being a responsible citizen of this country. How can you help the nation.

Answers for the above questions should be precise.

Stay safe and enjoy your family time. Good luck.
